PRECISION IN EVERY PROCESS

CORPORATE MANUFACTURING PROFILE | 2026 DESIGN EDITION

VIJAYA MANOHAR INDUSTRIES PVT. LTD.

Integrated sheet metal manufacturing solutions

COMPANY AT A GLANCE

A manufacturing partner focused on quality and delivery

Established in 2011, Vijaya Manohar Industries Pvt. Ltd. provides end-to-end precision metal fabrication and manufacturing services.

Manufacturing strengths

40,000 sq. ft. facility area (as stated in the source profile).

Cutting, forming, fabrication, machining and surface treatment under one roof.

Customer-focused planning, quality and delivery processes.

OUR APPROACH

From requirements to finished components

Integrated manufacturing processes help coordinate material planning, production, inspection and dispatch.

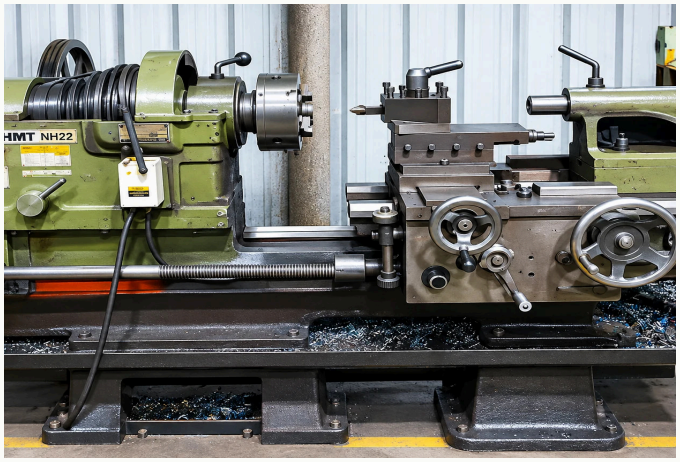

Systems highlighted in the company profile

Material requirements planning (MRP) and production planning control (PPC).

Process quality management (PQM) and new product development (NPD).

Engineering change and project handover management.

CUTTING & BLANKING

Laser, plasma, profile cutting and saw cutting

12 kW SIL laser: up to 25 mm thickness; stated bed size 2,000 x 4,000 mm.

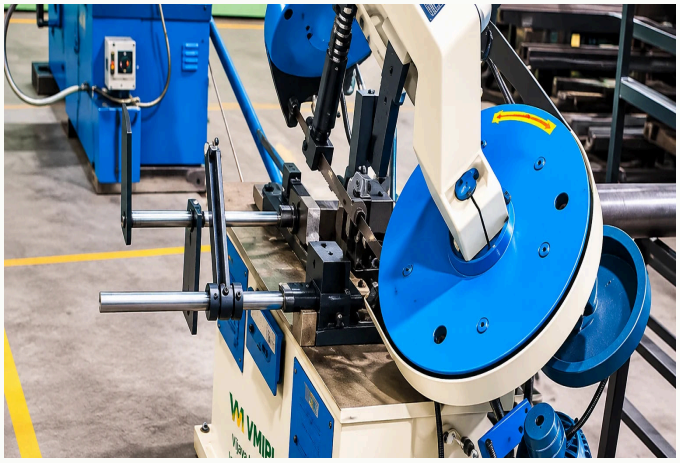

Plasma/oxy cutting: up to 150 mm thickness; stated bed size 2,500 x 12,000 mm.

Additional profile cutting and band saw operations.

FORMING & BENDING

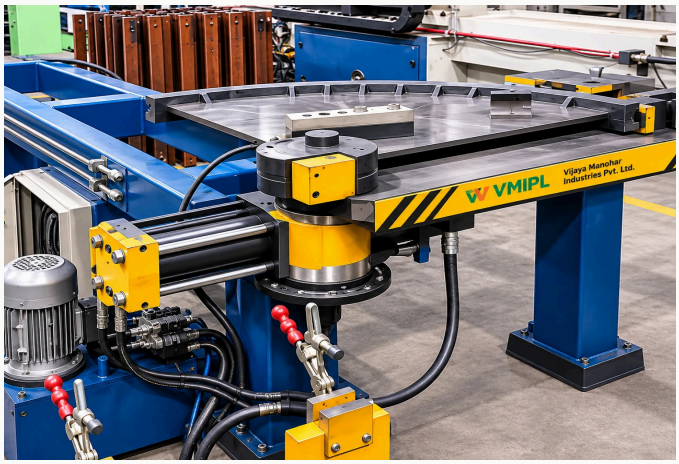

Press brakes, pipe bending and rolling

Press brakes listed at 250 MT and 150 MT in the machinery table.

Three-axis pipe bending up to 65 mm diameter; rolling up to 1,500 mm length.

Hydraulic forming equipment is also illustrated in the source profile.

WELDING & FABRICATION

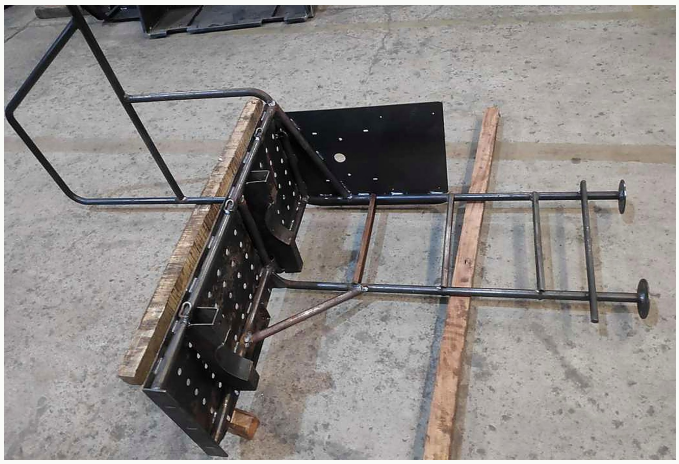

Fabricated assemblies and joining processes

The company profile lists MIG/MAG/TIG/laser welding equipment, including 25 welding machines.

Capabilities include sheet metal components, brackets, guards, frames and welded assemblies.

Equipment quantities and current availability should be confirmed before publication.

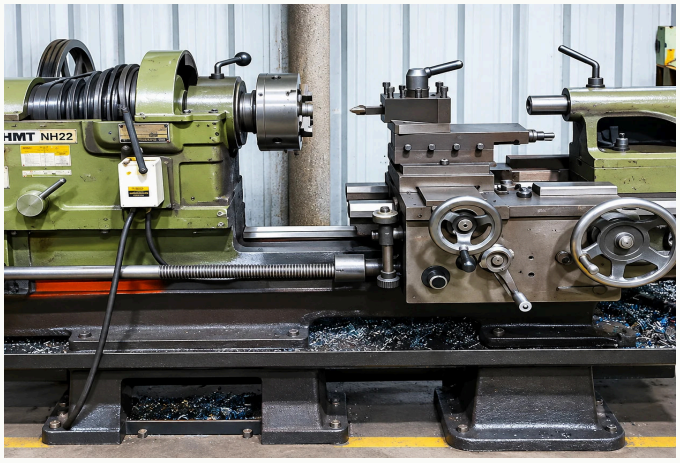

PRECISION MACHINING

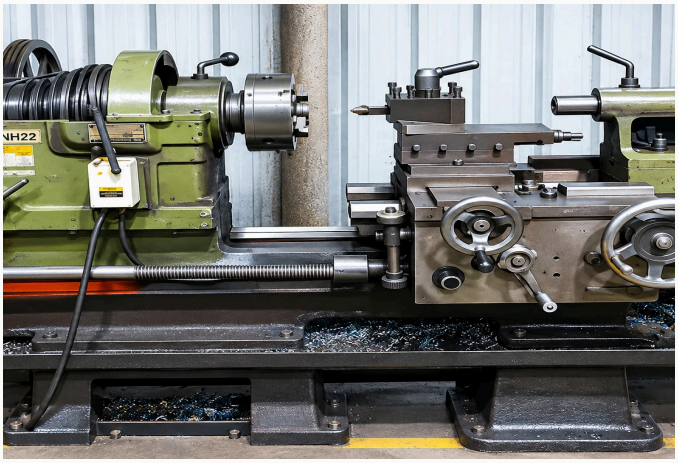

VMC, milling, drilling and lathe operations

The profile lists six VMC machines and machining equipment including milling, plano milling, drilling and turning.

Maximum VMC working dimensions are described in the machinery table; final published values require confirmation.

SURFACE TREATMENT

Preparation, coating and finishing

Shot blasting, chemical pretreatment and powder coating are shown in the original profile.

Powder coating oven: approximately 1.7 x 5.1 x 1.7 metres, as listed.

An effluent treatment plant is also included in the machinery list.

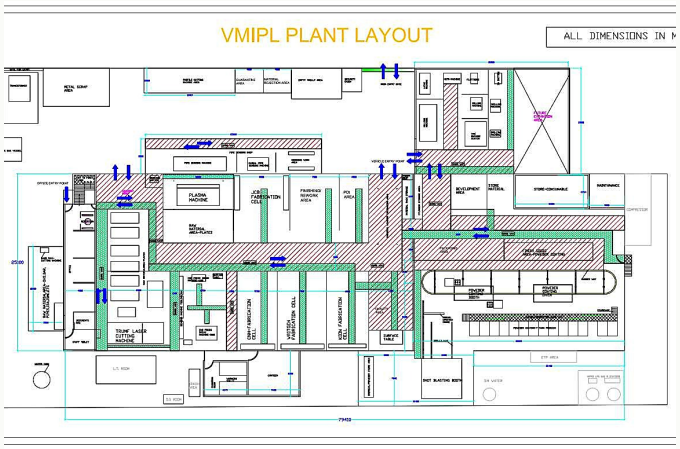

OUR INFRASTRUCTURE

Integrated manufacturing under one roof

The company profile describes a total facility area of approximately 40,000 sq. ft., with 25,000 sq. ft. utilized at the time of publication.

Dedicated production, machining, surface treatment and inspection facilities support manufacturing workflows.

QUALITY ASSURANCE

Inspection, controls and quality management

The original company profile identifies ISO 9001:2015 certification; its current validity must be verified.

Inspection resources include surface tables, gauges, micrometers and vernier calipers.

A designated quality area and quarantine storage are shown in the source photographs.

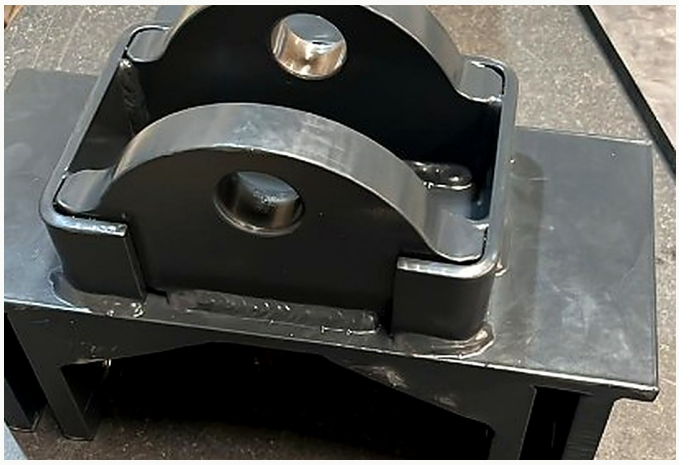

TRACTOR COMPONENTS

Fabricated parts for agricultural equipment

The original portfolio illustrates railings, handles, toe hooks, counterweights, steering cylinder safety guards and throttle lever rods.

The following images are drawn from the uploaded VMIPL company profile.

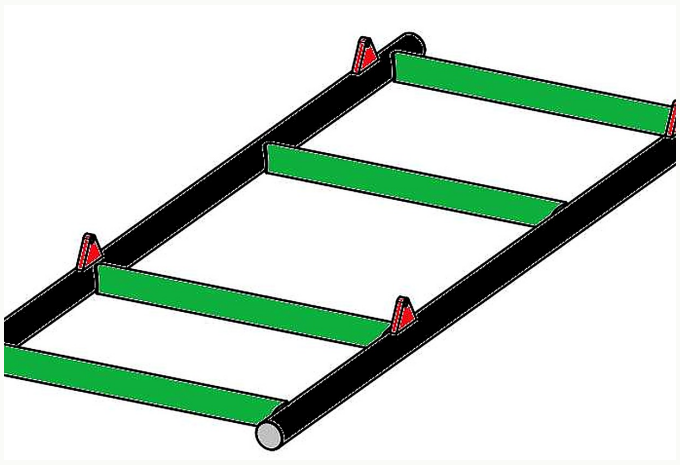

HARVESTER COMPONENTS

Tubular and light fabrication solutions

The profile showcases sugarcane harvester components such as ladders, side rails, handrails, topper mast and protective guards.

Component suitability and specifications are evaluated against customer drawings.

CONSTRUCTION EQUIPMENT

Steel components and structural fabrications

The portfolio includes construction equipment components and excavator parts, including arm plates, boom side plates, rear plates and base plates.

Illustrative product images are retained from the original company profile.

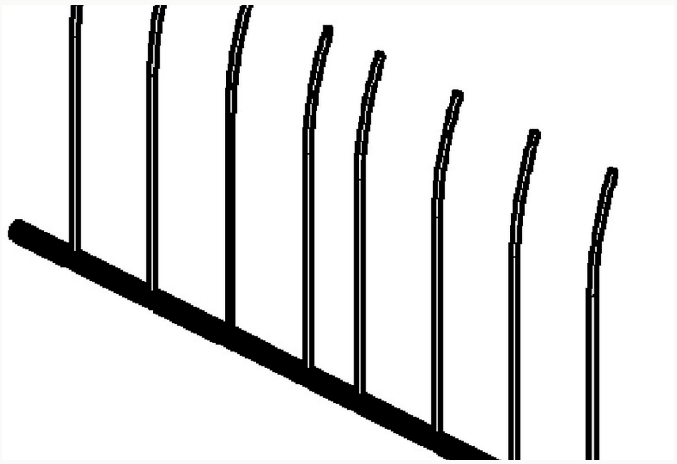

ADDITIONAL PRODUCTS

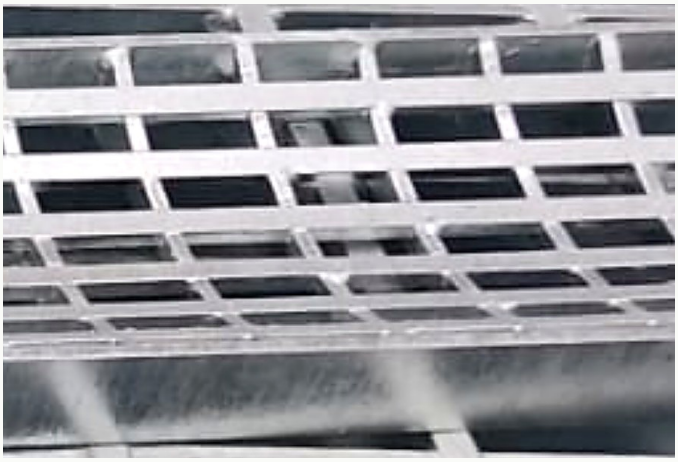

Baler machine parts and metal gratings

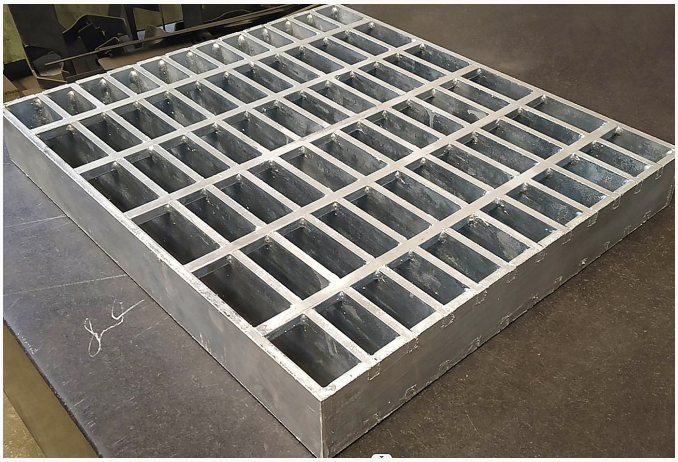

The profile illustrates baler machine wind guards, angle welded assemblies and base frames.

Metal gratings include rectangular and radius configurations, with hot-dip galvanizing shown in the portfolio.

CUSTOMERS & PARTNERSHIPS

Experience serving industrial equipment sectors

The uploaded profile displays customer logos including JCB, Hyster-Yale, CNH Industrial, Dynapac, Danfoss, KION Group and Cooper.

Current customer relationships and permissions to display their logos should be confirmed before publication.

Our focus

Manufacturing quality, cost competitiveness, delivery reliability and continuous improvement.
